

# Kanty Gakima . Jarvis Consulting

Computer Science graduate with practical experience in software development, data processing, and data-driven applications. Skilled in Python, SQL, Bash, and Java through academic and hands-on projects. Interested in opportunities in data engineering, data analytics, or related technical fields, contributing to the development of data pipelines, automation workflows, and efficient, well-structured solutions.

## Skills

**Proficient:** Java, Python, SQL (PostgreSQL, MySQL), Linux/Bash, Pandas/Numpy, Agile/Scrum, Git

**Competent:** Docker, REACT, Data modelling and ETL concepts, Cloud fundamentals (GCP/AWS concepts), JUnit, JavaScript

**Familiar:** Power BI, MongoDB, REST API, PHP, C++, Apache Spark

## Jarvis Projects

Project source code: [https://github.com/jarviscanada/jarvis\\_data\\_eng\\_KantyGakima.git](https://github.com/jarviscanada/jarvis_data_eng_KantyGakima.git)

**Linux Cluster Resource Monitoring App** [GitHub]: Implemented a monitoring agent using Bash/Shell scripts and Linux utilities to collect hardware specifications and real-time usage metrics from multiple hosts. Deployed a Docker-containerized PostgreSQL database to store collected data and automated continuous ingestion using crontab. The system provides a centralized, reliable data pipeline for performance monitoring, analytics, and maintenance.

## Highlighted Projects

**International Data analysis:** Conducted a data analysis project focused on collecting, cleaning and transforming socio-economic and demographic indicators extracted from multiple Wikipedia data tables, using Python, Pandas, NumPy, and Jupyter Notebook. Applied standard data preprocessing and exploratory analysis methods to identify and visualize patterns across countries.

**Recipe Management Web App** [GitHub]: Developed a full-stack web application in a two-person team, that enables users to create, organize, and manage recipe tiles with real-time updates across all connected users. Built with PHP, MySQL, JavaScript, HTML, and CSS, using a REST API and asynchronous fetch requests to support CRUD operations and instant synchronization.

**Travel reservation system:** Developed a Java-based reservation system centered on structured data modelling and system logic. Designed core components using object-oriented principles and UML diagrams in Visual Paradigm, implemented reservation workflows, and validated functionality with JUnit tests. The project focused on clean data structures, reliable application logic, and maintainable code aligned with software engineering best practices.

## Professional Experiences

**Data Engineer, Jarvis (2025-present):** Designed and developed data workflows and backend components using SQL, Python, Java, Bash, and Linux-based tooling. Implemented automation scripts and containerized environments with Docker. Collaborated within an Agile team using Git to deliver maintainable and well-structured solutions.

**Technical Assistant (Part-time), Université de Montréal - Philanthropy and Alumni Department (2022-Present):** Managed, validated, and updated alumni and donor data in compliance with governance and confidentiality standards. Supported outreach campaigns by conducting high-volume outbound calls and analyzing performance results to refine scripts and improve interaction quality. Contributed to onboarding and training by enhancing internal documentation, updating workflows, and providing guidance to new assistants.

**Bilingual credit card specialist, TD Canada Trust (2024-2025):** Handled and documented 70+ daily interactions related to credit card management and account openings while maintaining strict compliance with security and confidentiality standards. Analyzed client profiles to recommend tailored financial products that supported customer satisfaction and an improved user experience. Collaborated with internal teams to resolve incidents and anomalies efficiently, ensuring all cases were clearly, accurately, and traceably documented.

## **Education**

**Université de Montréal (2022-2024)**, Bachelor of Science, Computer Science

## **Miscellaneous**
